

PLATFORM CAPABILITIES

Technology Built to Power Your Payments Revenue

VizyPay's payments infrastructure is a four-part platform covering merchant boarding, omnichannel acceptance, settlement, and ongoing management. One integration. Every channel your merchants need.

Board. Transact. Settle. Manage.

Board	Transact	Settle	Manage
— White-label merchant application — Partner-specific underwriting controls — AI-leveraged risk engine — Dynamic application requirements — Sandbox access, day one	— In-depth card & ACH acceptance — Elements SDK — one integration — Industry-best card-present terminals — Token conversion tools — Seamless flows, all channels	— Flat rate & Interchange Plus options — Flexible settlement windows — Custom batching configurations — Instructional funding capability — Expedited merchant funding	— SSO to white-label merchant portal — Comprehensive partner admin portal — API data ingest capability — Customer reconciliation tools — Full dispute management suite

Omnichannel Payment Acceptance

Online / Card-Not-Present

One SDK for card & ACH with PCI scope reduction, a hosted pay-by-link page, fully portable tokenization for recurring billing, and ACH enabled on request — no added development.

In-Person / Card-Present

One 'write-once' API unlocks Clover and Ingenico terminals — EMV, contactless, Apple Pay, Google Pay. Auth-agnostic gateway support keeps existing devices in place. Transactions sync instantly.

Roadmap: tap-to-pay mobile rails and cost-effective Venmo/PayPal acceptance, coming on the same integration.

Integration: We Build This With You

Fastest go-live: one weekend. Typical timeline: 2 to 8 weeks. Your dev team is never alone.

- ✓ Kickoff & sandbox access — day-one credentials plus a dedicated Solutions Engineer
- ✓ Guided API integration — walked through every endpoint, every edge case
- ✓ Test & certify together — full end-to-end testing in our production replica
- ✓ Go live & stay engaged — VizyPay stays hands-on for 90 days post-launch

What We Bring to Your Dev Team

Dedicated Solutions Engineer

A named VizyPay contact assigned from kickoff through go-live — one person, full accountability.

Code-Level Assistance

We review your implementation and provide working code samples for every integration scenario.

PCI Compliance Guidance: We handle scope reduction so your team stays at SAQ-A, the simplest certification level.

The Revenue Opportunity Behind the Platform

Every merchant you board through this platform becomes a residual revenue stream — compounding as your portfolio and merchant volumes grow.

1,000 Merchants \$45K/mo avg		\$1.08M/yr
1,500 Merchants \$50K/mo avg		\$1.80M/yr
2,000 Merchants \$55K/mo avg		\$2.64M/yr

Projected annual residual revenue by portfolio size, conservative 40% merchant activation. Ask your VizyPay contact for a model built around your specific portfolio.
